## My Bio and Journey Plan

I am applying as a trainee/apprentice. Unfortunately I can't provide you work experience however I am willing to put my best effort and dedication to learn, grow, adopt new skills. I believe everyone has to start at some point, we all share that initial moment but its the learning and growing ability which makes their future. I am offering my energy and strong dedication. With your help, I would walk the best possible path fate has for me. I am a self taught coder or programmer, I don't memorize LeetCode problems but yes I keep in mind the patterns I get to see. I push myself but I need some ground and team to learn more. I believe my strong will and ability to adopt faster will help me becoming strong asset to your for your organization.

## STRENGTHS AND EXPERTISE

Problem-Solving Skills  
Mathematics  
Positive Attitude

Logical Approach  
Eagerness to learn  
Attention to detail

Team Player  
Communication  
Strong Work Ethic

## SKILLS I HAVE LEARNED

- I have started my learning from **programming in C**. it helped me learn very basic idea of its system, then I thought I need to write more realistic programs. So I learned **OOP**.
- I picked up **C++** to expand my area of learning, I practiced problems on **Codeforces** and **Leetcode**. It helped me a lot to comprehend logics in programs. At that time AI was booming so I wanted to learn more about it. I got to know new words like **Machine Learning, Deep Learning, Natural Language Models and etc**. I looked up and found some resources and started learning the next thing which is,
- **Python**. It was easy to adopt and I learned and practices **Data Structures and Algorithms** with it. Still I solve Leetcode problems with python.
- In between all these there are other useful things I have learned which helps me alot in work, they're: **Git, GitHub, Prompt for AI**.
- Next would be **Pandas** and **SQL**. I want to learn, practice and grow.

## EDUCATION

### **HSC (Year - 12)**

**Residential College, Dhaka, Bangladesh**

I have done my year-12 from overseas. Then I moved to Australia with my family.
